

Lab 2

Student Registration System

Functional Requirement:

1. The system should allow students to add or drop courses.
2. The system should allow students to view their course schedule.

Non-Functional Requirement:

1. The system should be fast and accept a large volume of students within 5 seconds of trying to login.
2. The system should be secure and only permit access to view their own information.

Online Store

Functional Requirement:

1. The system should allow customers to add items into the cart.
2. The system should allow customers to view purchase history.

Non-Functional Requirement:

1. The system should provide a secure payment checkout for customers.
2. The system should have a high performance and respond to user's action within 3 seconds.
